

Candidate-to-Offer Camp

Your guide to Coach Rose Nylund's Job Coach: from profile to offer, one step at a time

scaruana33-code.github.io/mock-interviews2

Set up once, then every job flows from fit to offer

Before you start: 20 minutes and four things

A desktop browser
Edge or Chrome. Everything runs in the browser.

Your résumé
As text, .docx or .pdf. Every score is built from it.

2 or 3 job postings
Copy the full description, not just the title.

A free AI assistant
Optional: Microsoft 365 Copilot or any chat assistant.

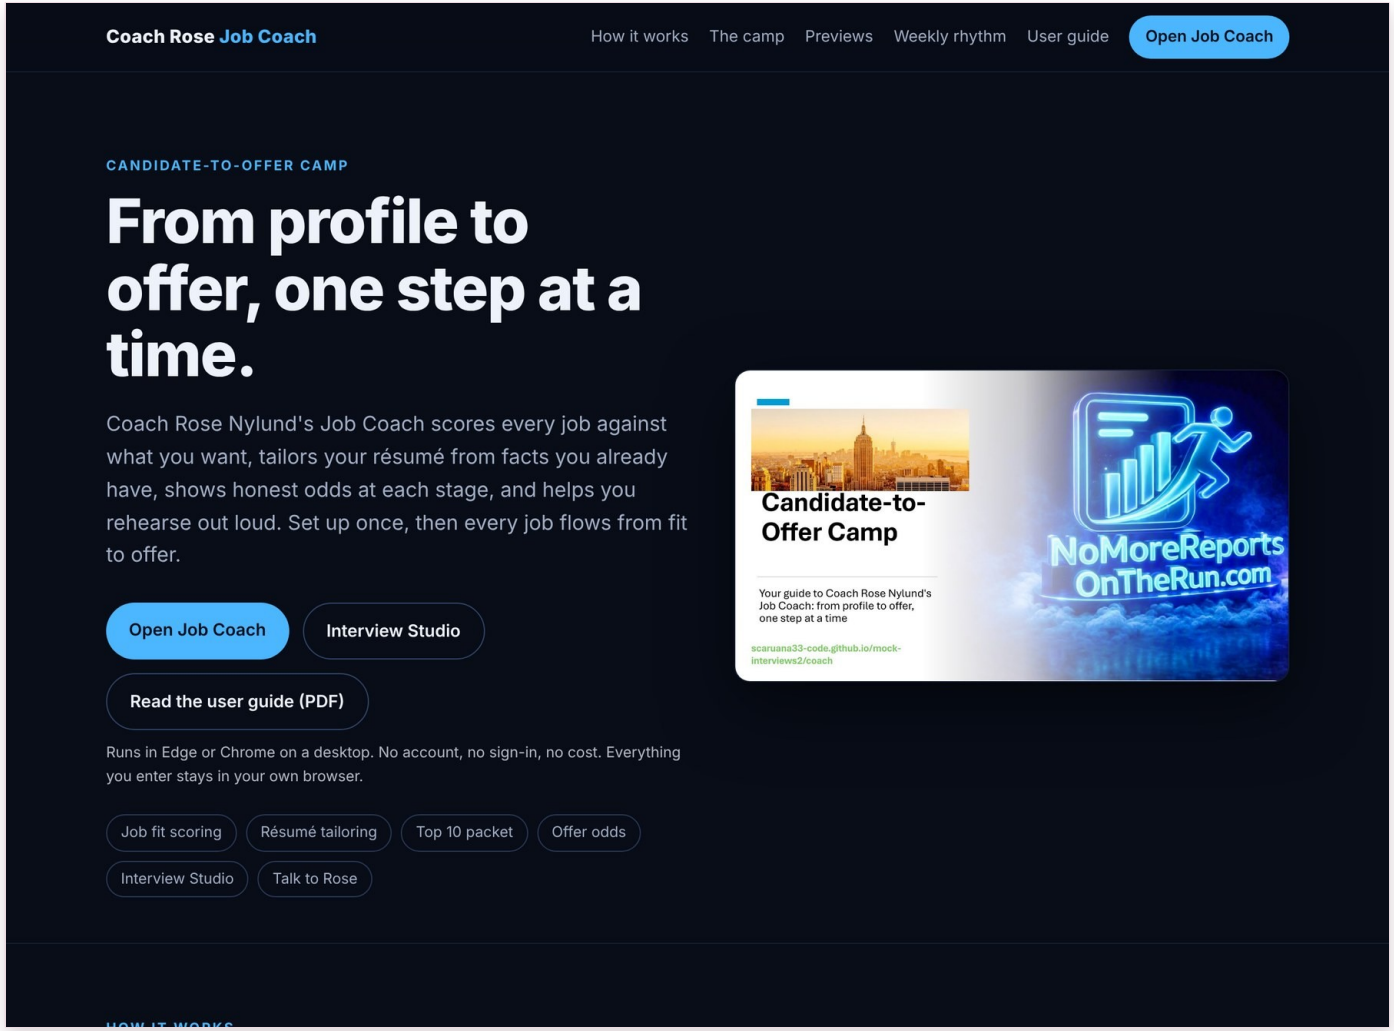

Your privacy

- Saved in this browser only. Nothing is uploaded unless you add your own AI key to Talk to Rose.
- No account, no sign-in, no cost.
- Never asks for or uses age, race, gender or disability.
- Back up or move your data any time from the Data tab.

Start at the front door

One address for everything: the Job Coach, the Interview Studio and this guide.

1. Go to scaruana33-code.github.io/mock-interviews2
2. Press Open Job Coach to start your camp
3. Press Interview Studio to rehearse answers
4. Press Read the user guide (PDF) any time

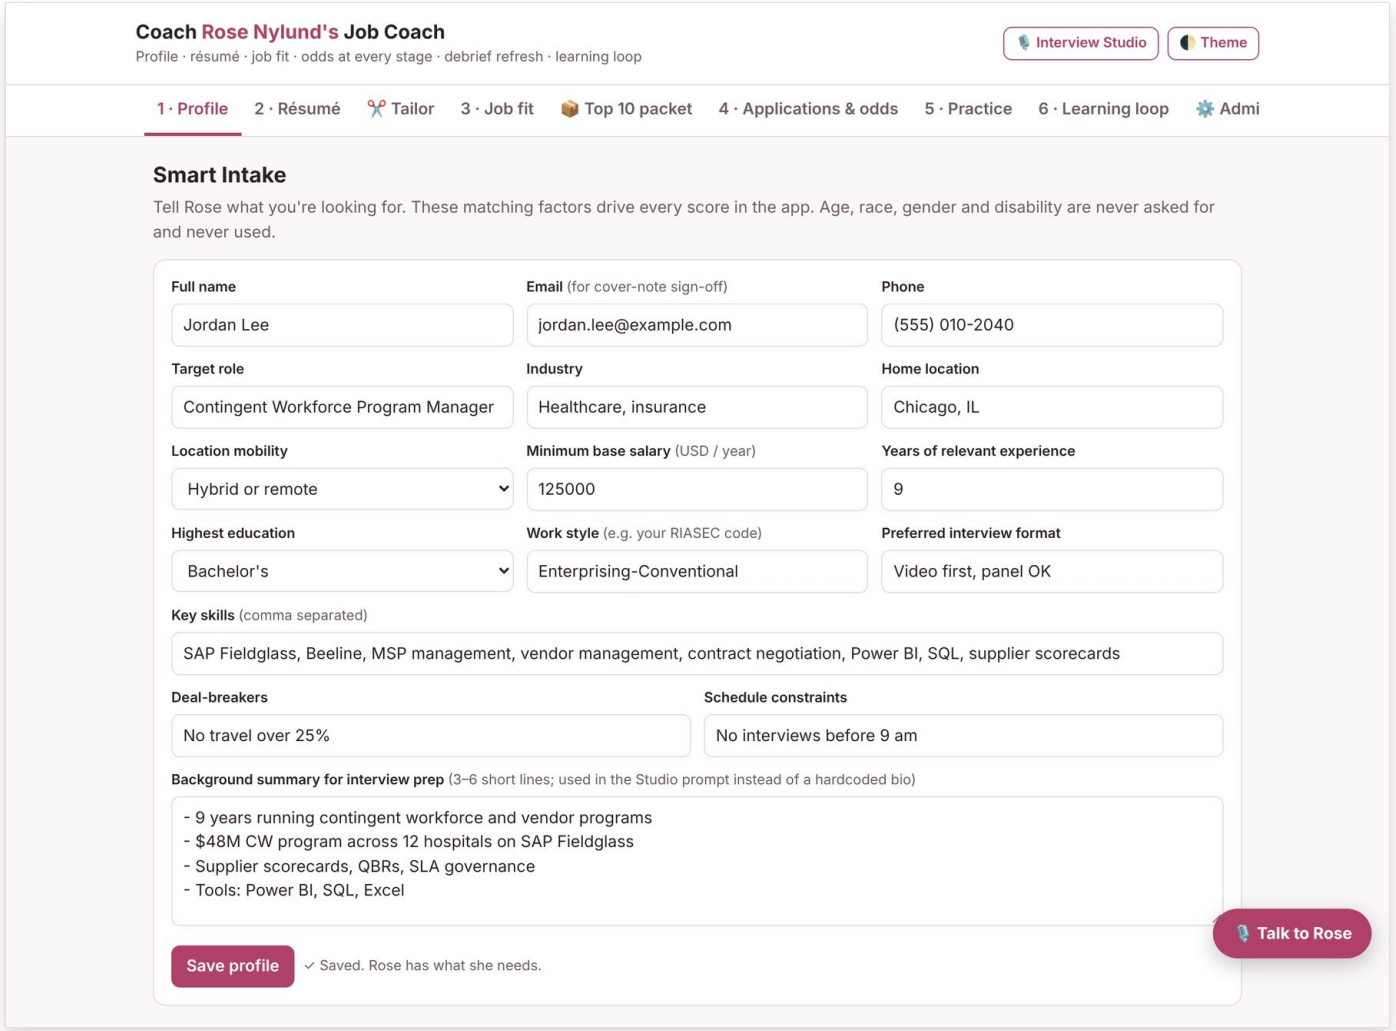

Done when: the front door is bookmarked in Edge or Chrome.

1 Profile: tell Rose what you want

Every score in the app is weighed against your profile.

1. Open the 1 · Profile tab
2. Fill in target role, location mobility, minimum salary and key skills
3. Add a 3 to 6 line background summary for interview prep
4. Press Save profile

Done when: role, mobility, salary floor and skills are saved.

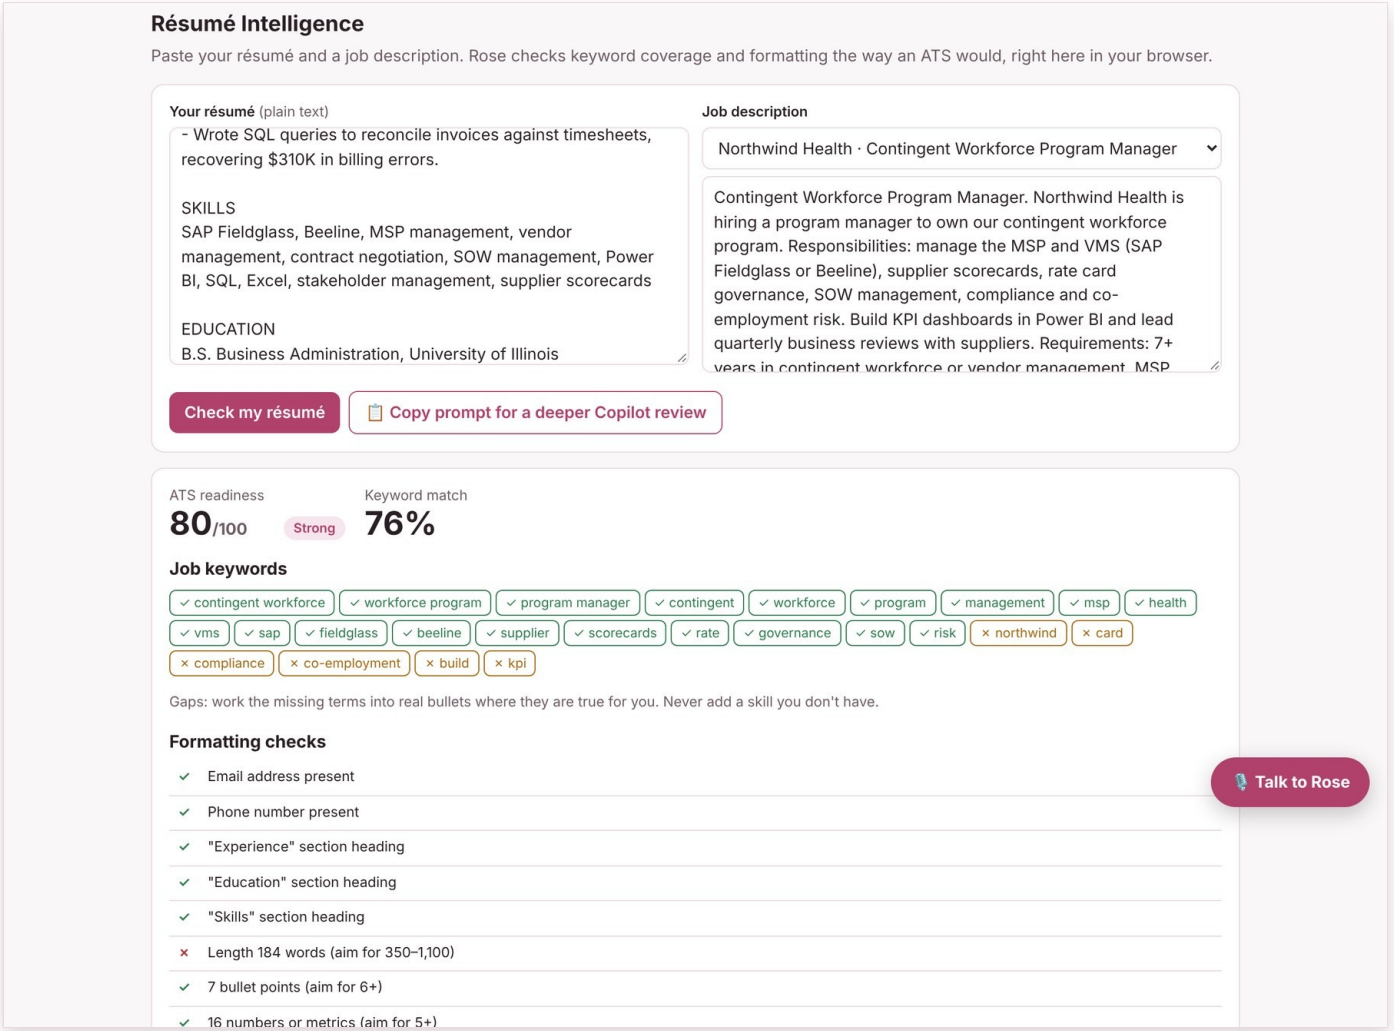

2 Résumé check: see what an ATS sees

Find the keywords a posting wants that your résumé doesn't say.

1. Paste your résumé as plain text
2. Pick a saved job or paste a job description
3. Press Check my résumé
4. Fix formatting items; add missing keywords only if true

Done when: every formatting check you can fix shows a green tick.

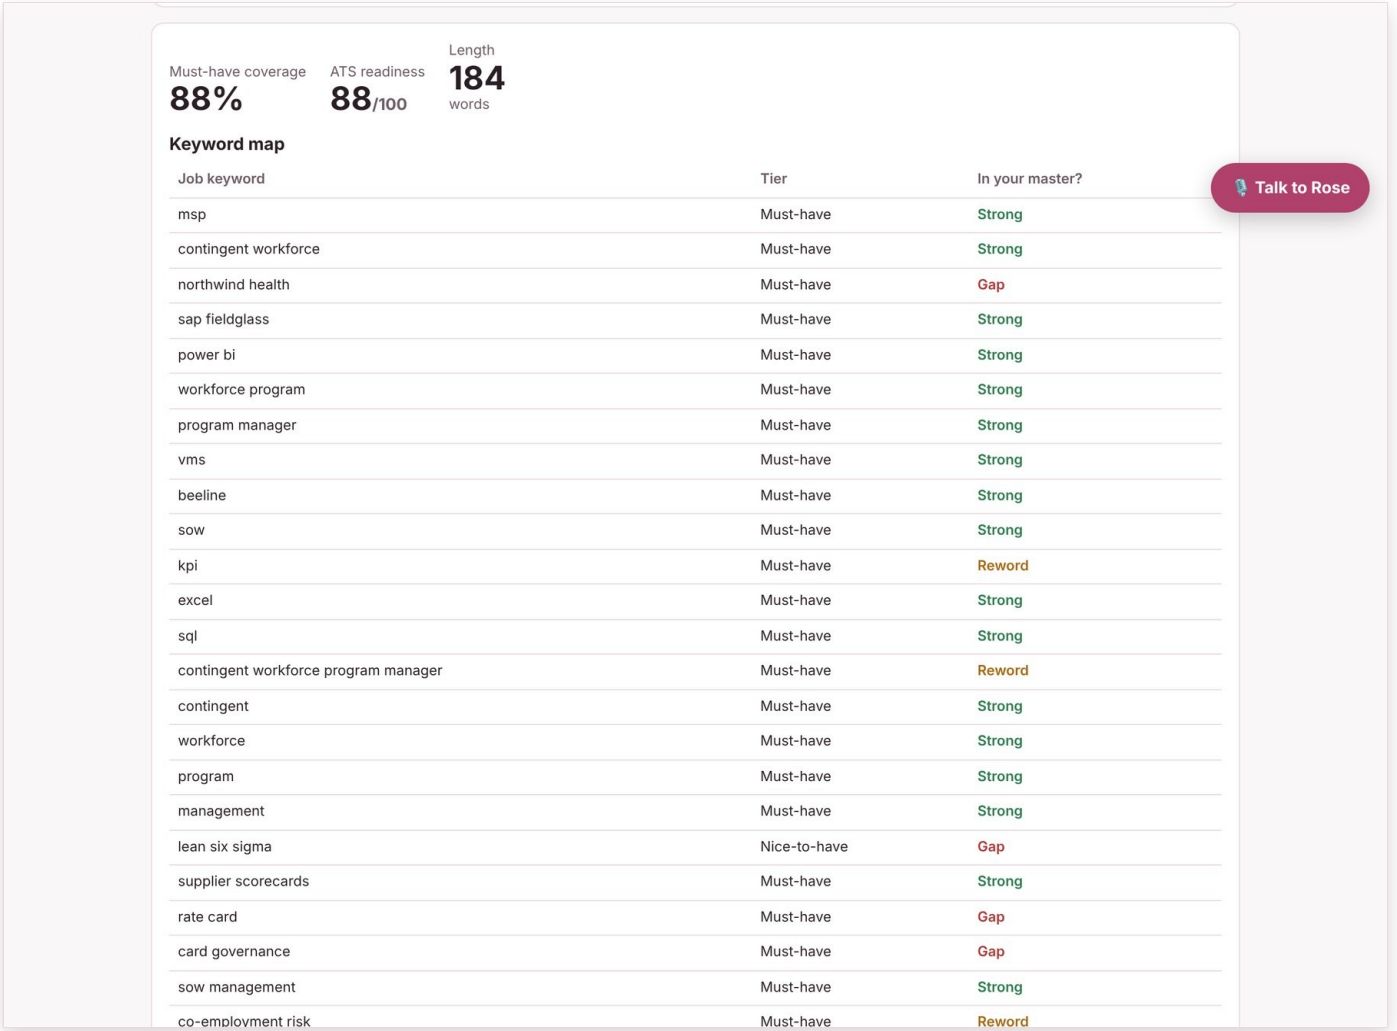

Tailor: aim your résumé at one job

Your master résumé is the only source of facts.
Gaps become questions, never claims.

1. Load your master résumé (saved on this device)
2. Pick a job and press Tailor & score
3. Read the keyword map: Strong, Reword or Gap
4. Copy the AI prompt, paste the result back, press Check it

Done when: gap questions are answered and the final version passes Check it.

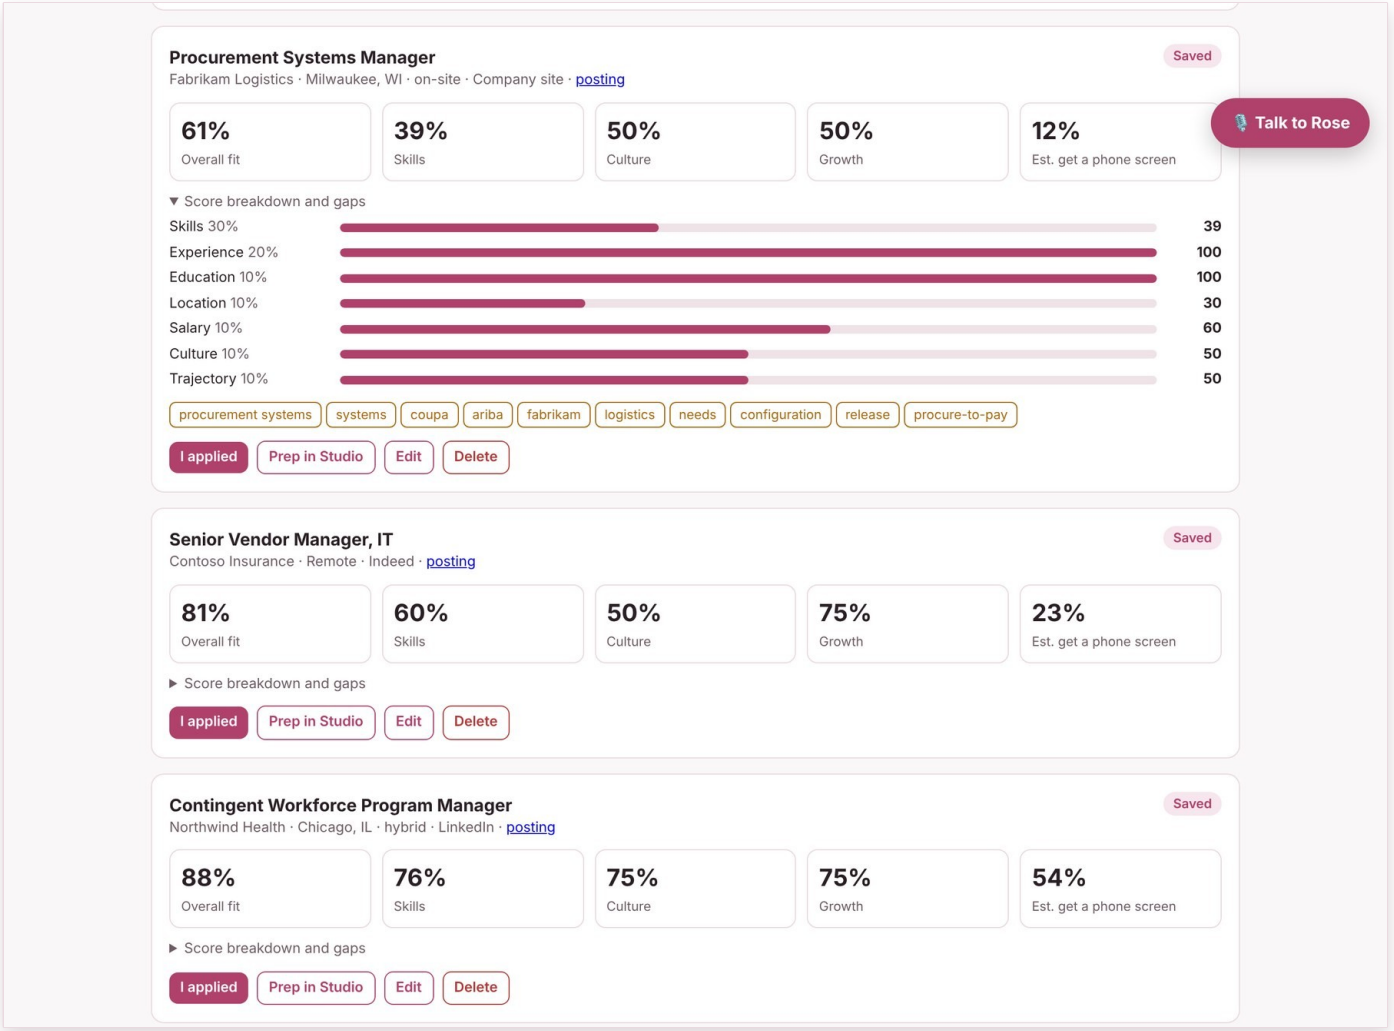

Job keyword	Tier	In your master?
msp	Must-have	Strong
contingent workforce	Must-have	Strong
northwind health	Must-have	Gap
sap fieldglass	Must-have	Strong
power bi	Must-have	Strong
workforce program	Must-have	Strong
program manager	Must-have	Strong
vms	Must-have	Strong
beeline	Must-have	Strong
sow	Must-have	Strong
kpi	Must-have	Reword
excel	Must-have	Strong
sql	Must-have	Strong
contingent workforce program manager	Must-have	Reword
contingent	Must-have	Strong
workforce	Must-have	Strong
program	Must-have	Strong
management	Must-have	Strong
lean six sigma	Nice-to-have	Gap
supplier scorecards	Must-have	Strong
rate card	Must-have	Gap
card governance	Must-have	Gap
sow management	Must-have	Strong
co-employment risk	Must-have	Reword

3 Job fit: score every job you're considering

Skills 30%, experience 20%, and education, location, salary, culture and trajectory 10% each.

1. Add company, title, location, salary and the full description
2. Slide culture fit and trajectory to your own read, 1 to 5
3. Tick the box if you have a referral, then Save job
4. Open Score breakdown and gaps on your top jobs

Done when: each job you're considering is saved and you've noted its gaps.

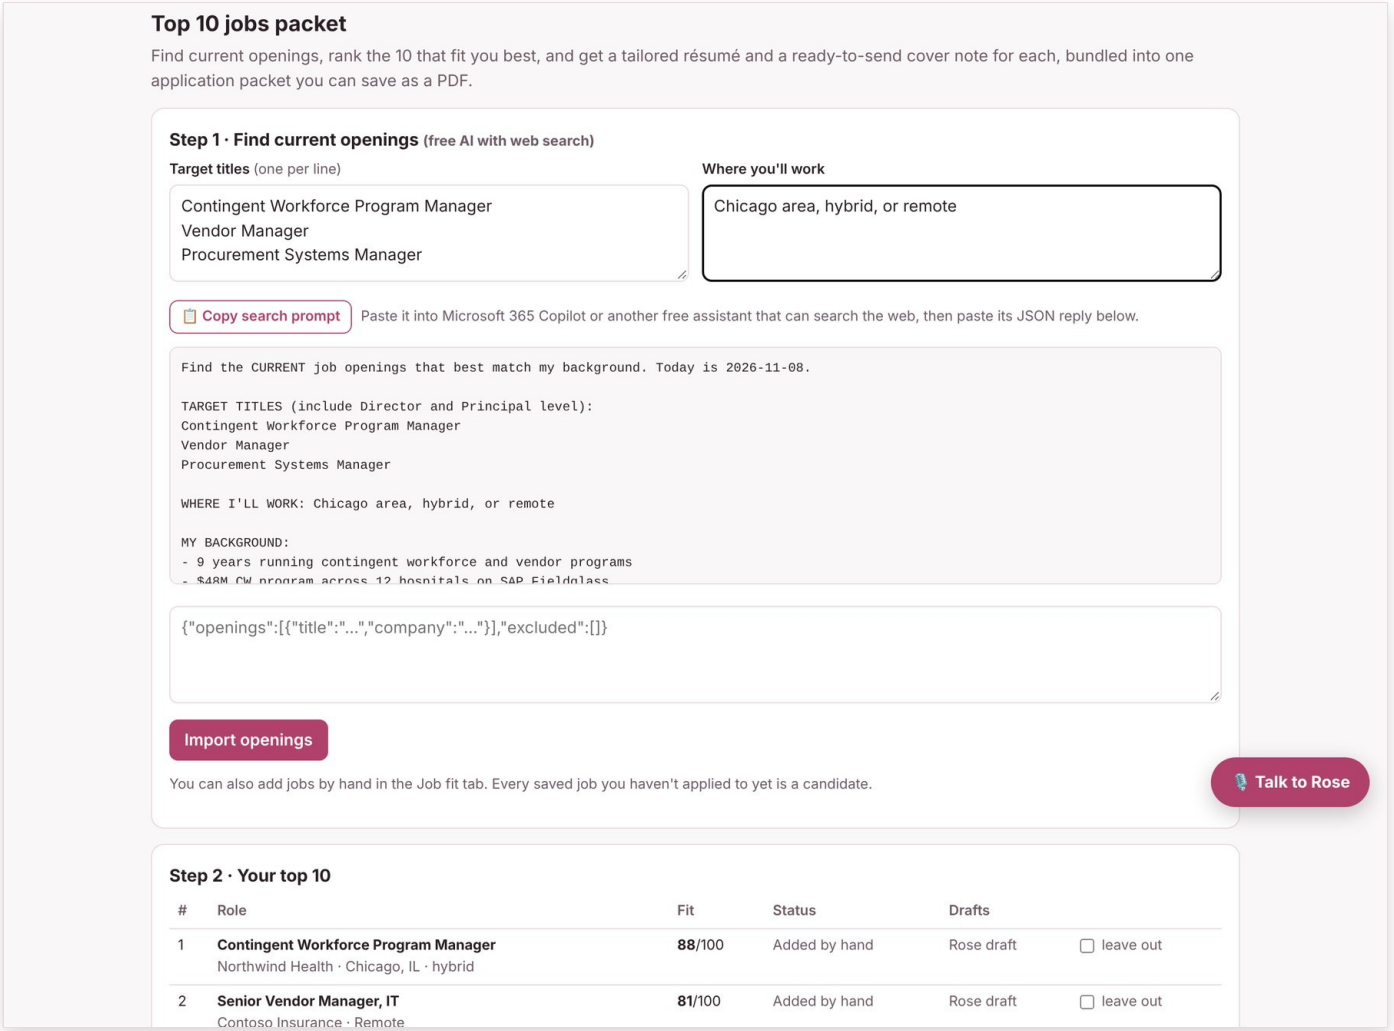

Top 10 packet: your best ten, ready to send

Find openings, rank the ten that fit best, and get a tailored résumé and cover note for each.

1. Copy the search prompt into an AI that can search the web
2. Paste its reply and press Import openings
3. Untick or leave out roles you don't want
4. Open the printable packet and save as PDF

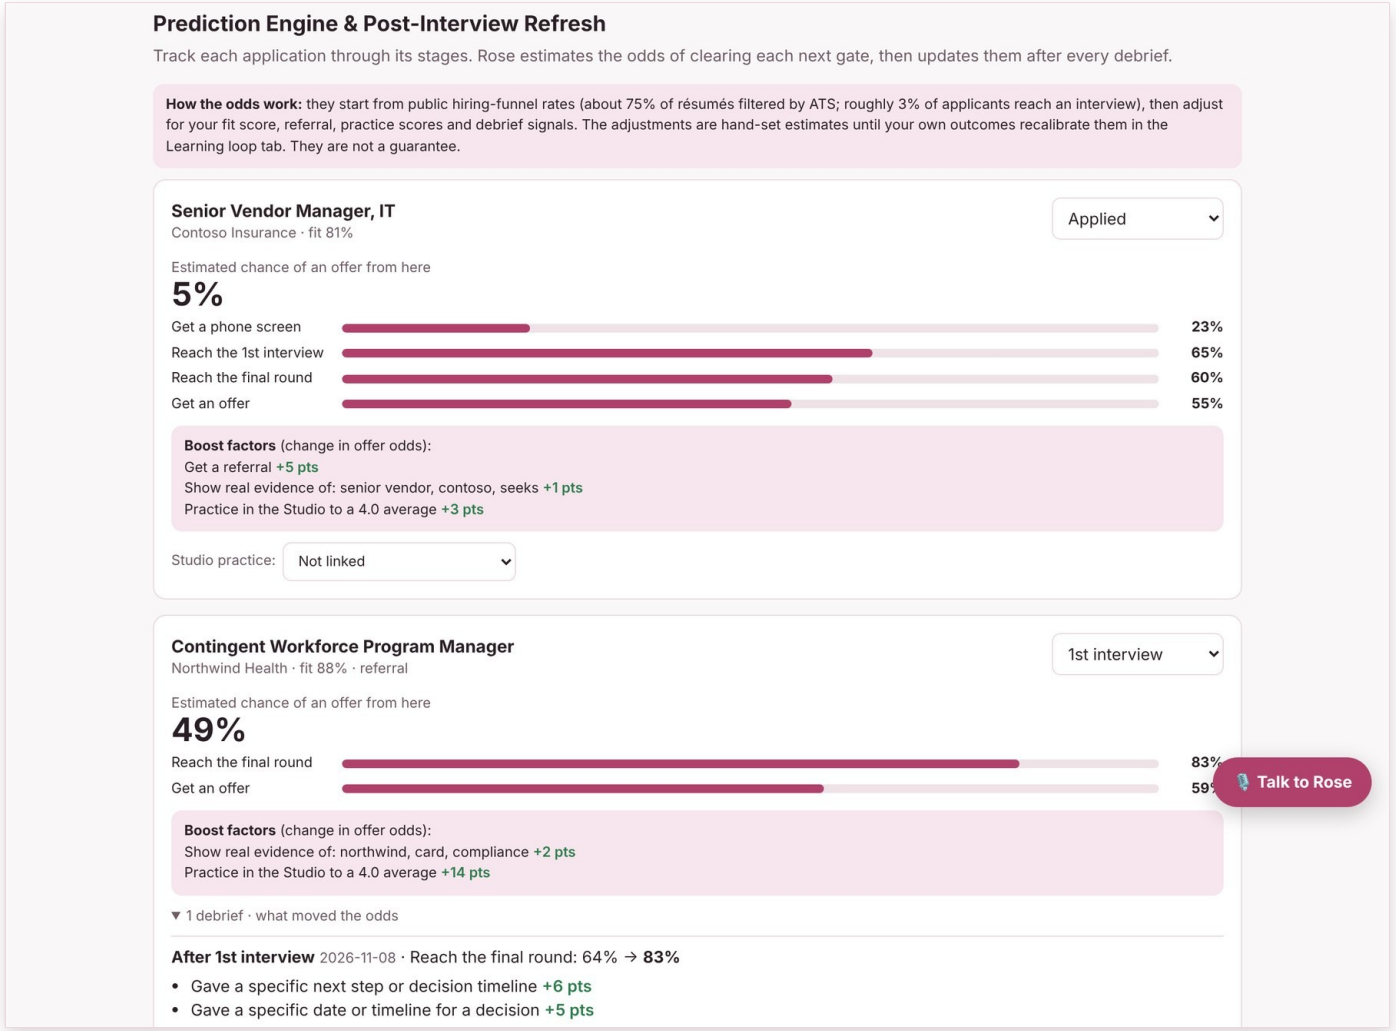

Done when: your top 10 is real roles and the packet and tracker are saved.

4 Applications & odds: know where you stand

Rose estimates your chance of clearing each next step, and updates it as you go.

1. Press I applied on a job to move it here
2. Change the stage as things progress
3. Read the offer odds and the bar for each next step
4. Use Boost factors to see what would raise your odds

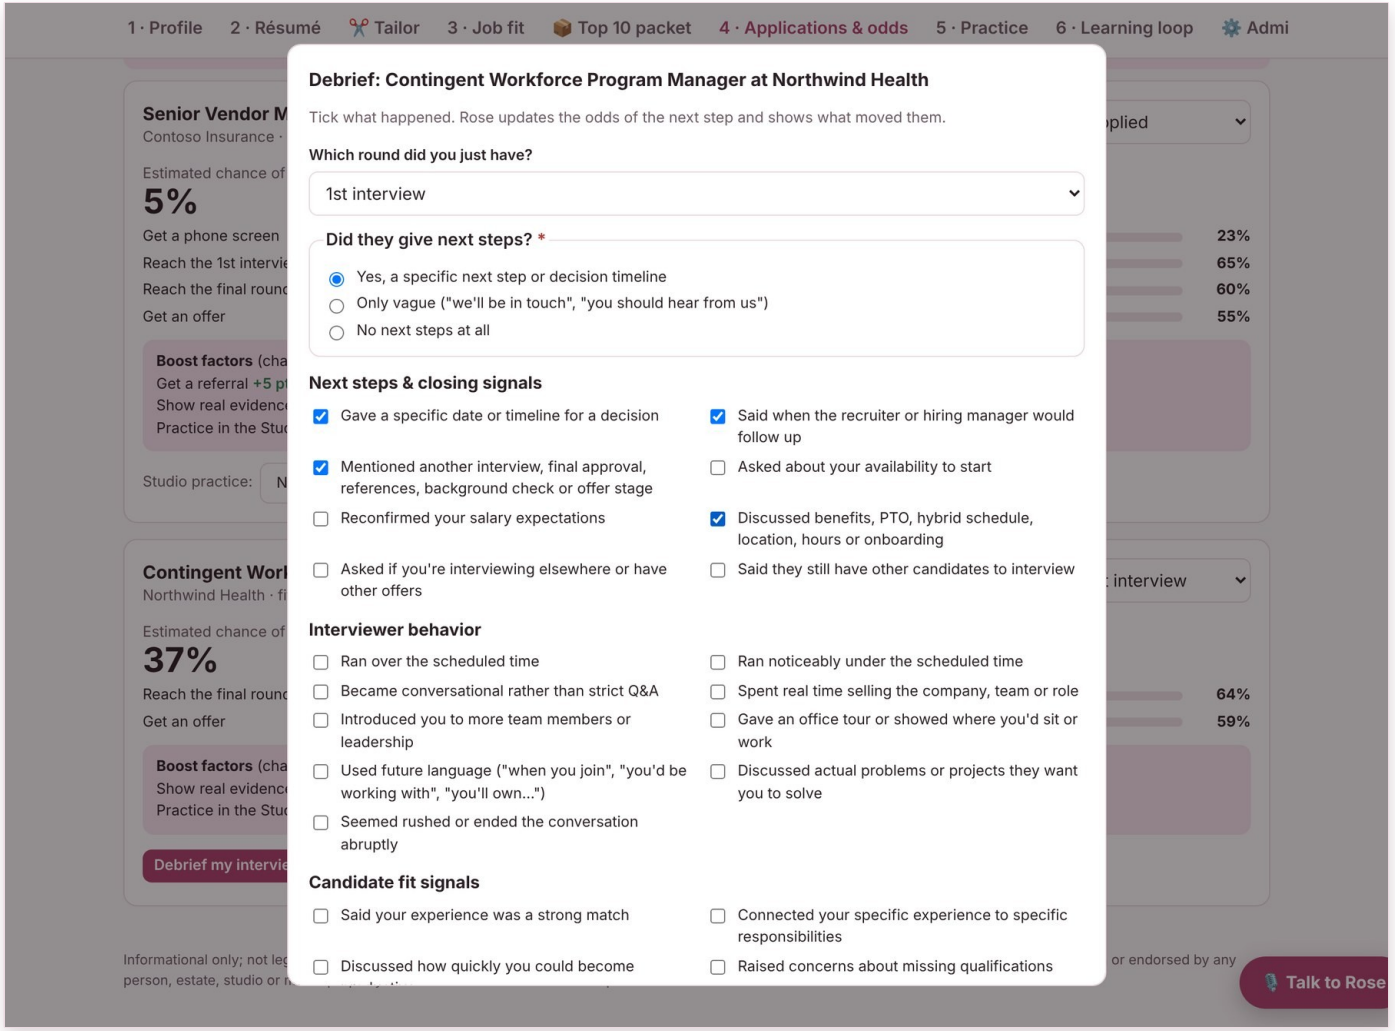

Done when: every application shows its current stage.

4 Debrief: log each interview the same day

A specific next step or decision date tells you more than how friendly it felt.

1. Press Debrief my interview and choose the round
2. Answer Did they give next steps? (required)
3. Tick what happened in the four signal groups
4. Press Update my odds and read the final analysis

Done when: the debrief is logged and the follow-up is sent.

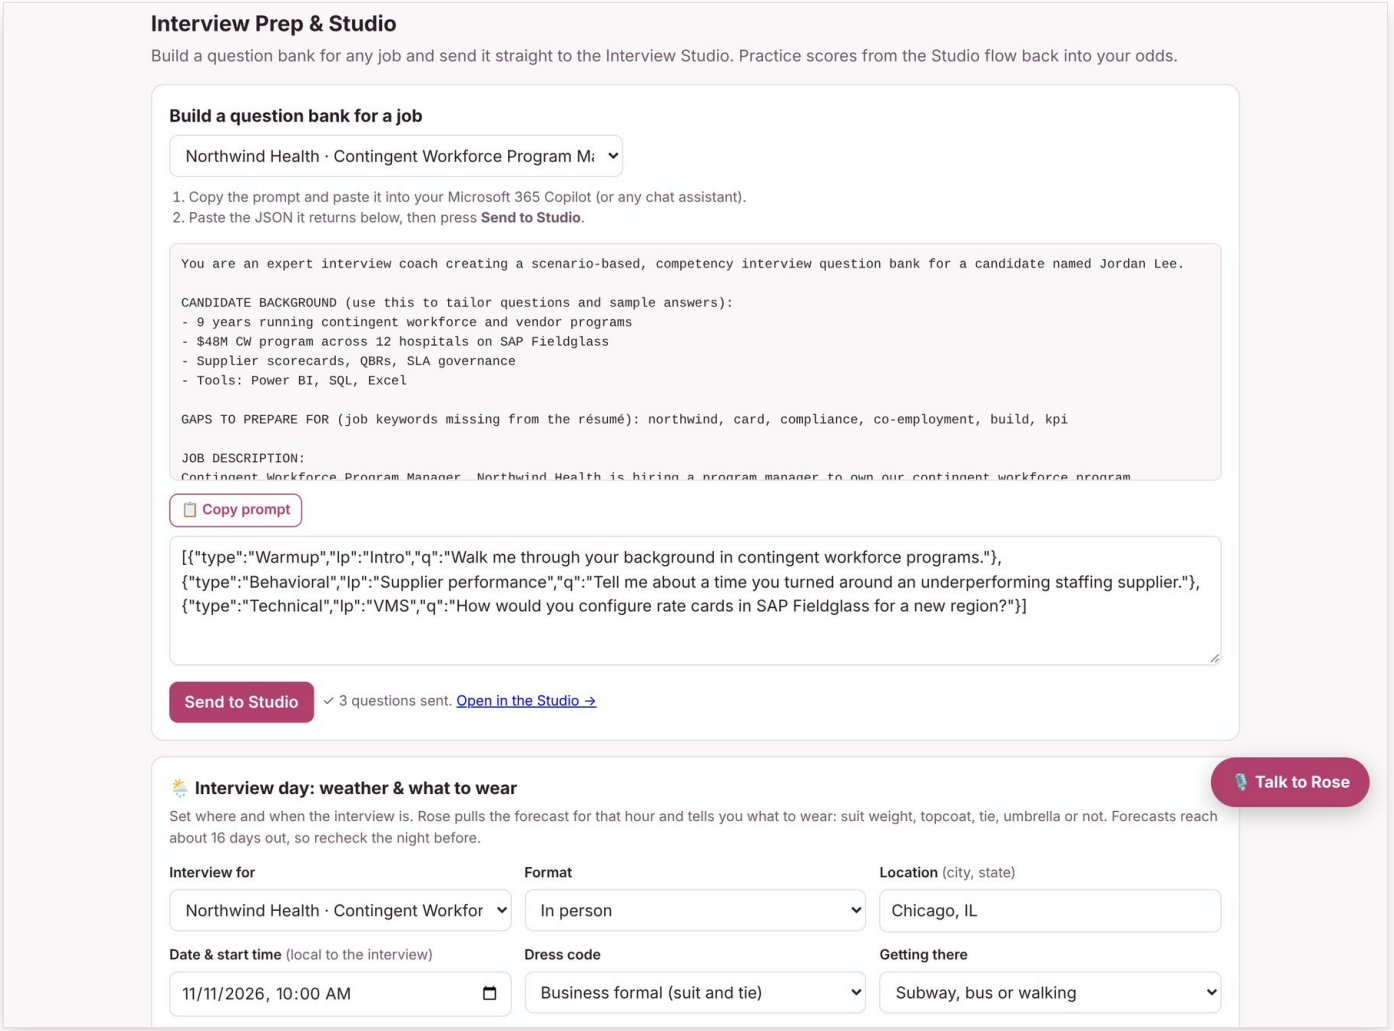

5 Practice: build the question bank

Questions written from the job, your background and your gaps.

1. Pick a saved job, or press Prep in Studio on its card
2. Copy the prompt into your AI assistant
3. Paste its JSON and press Send to Studio
4. Practice scores flow back into your odds

Done when: each upcoming interview has a question bank in the Studio.

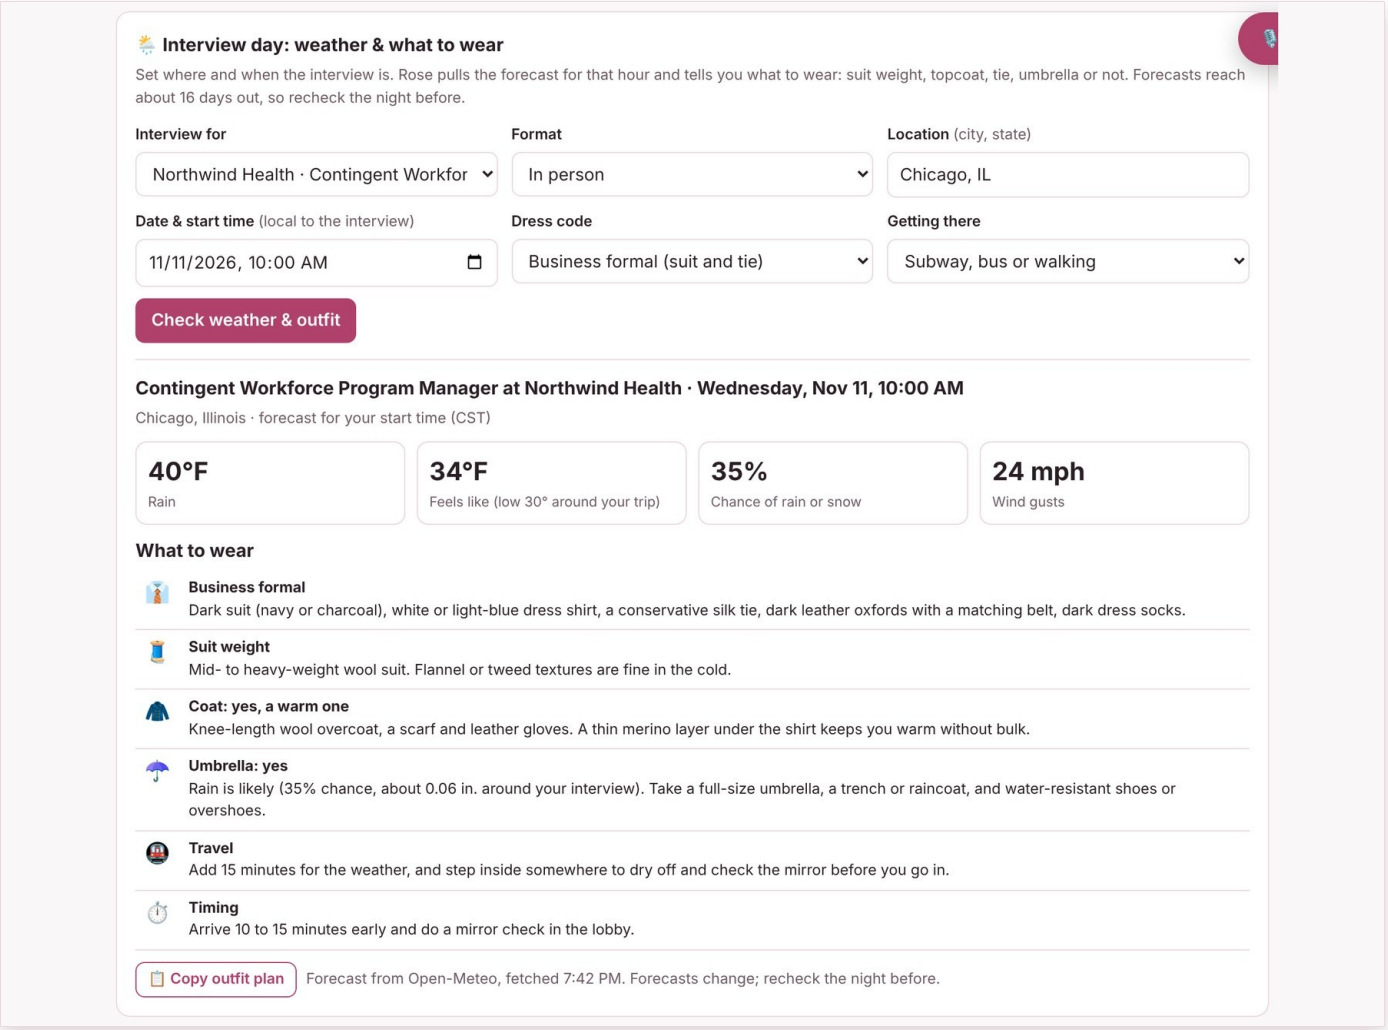

Interview day: weather and what to wear

The forecast for your interview hour, turned into what to wear.

1. Pick the job, format and dress code
2. Enter the city, date and start time
3. Choose how you're getting there
4. Press Check weather & outfit; recheck the night before

Done when: your outfit plan is set the night before.

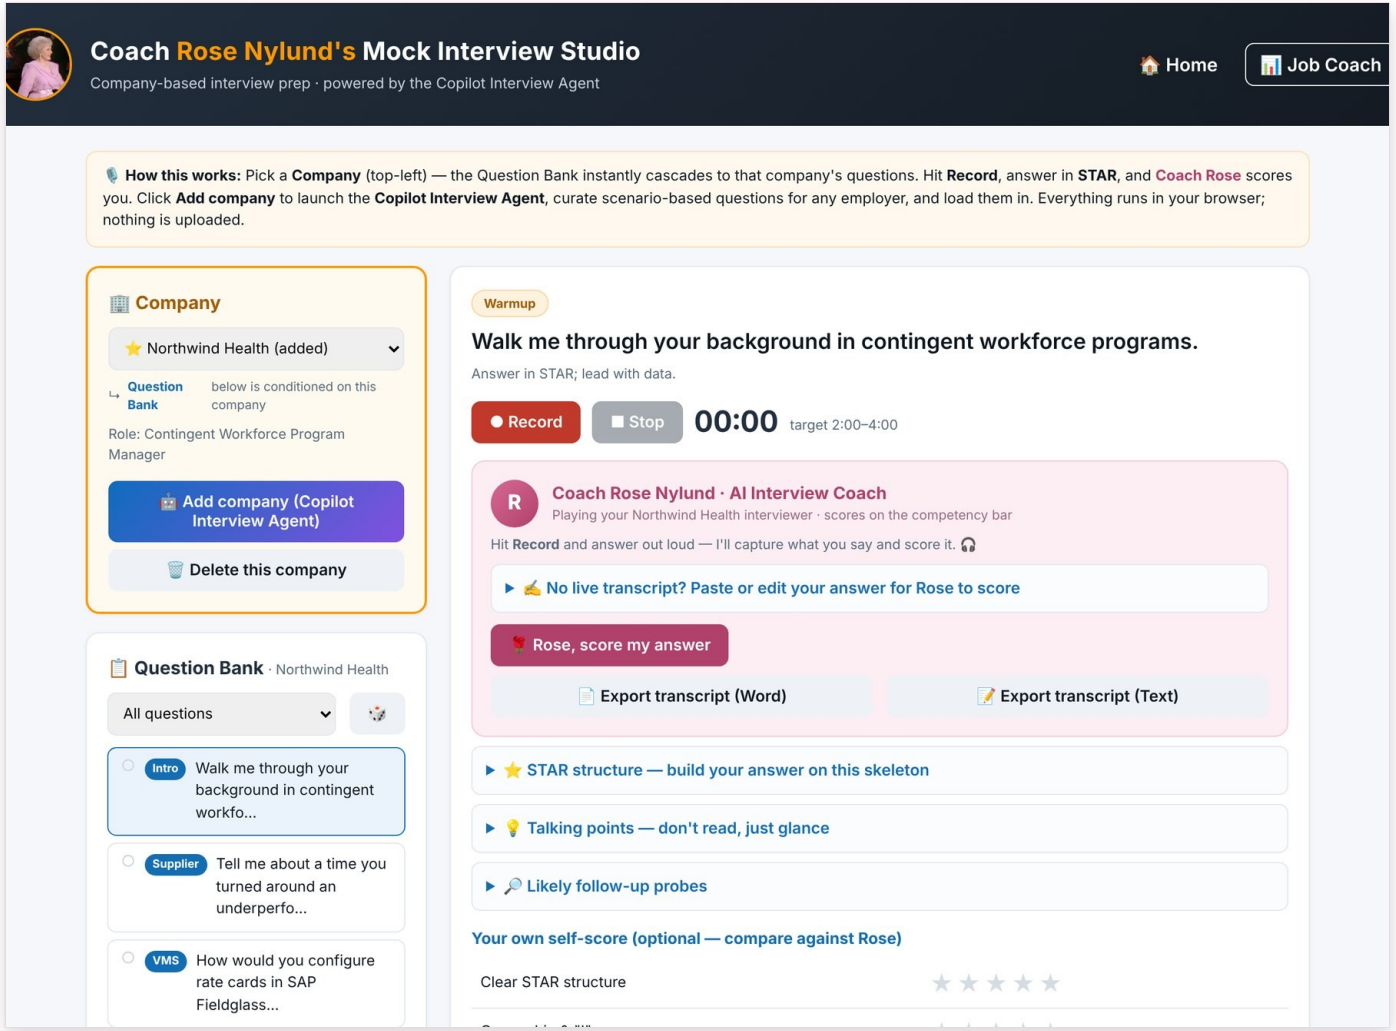

5 Interview Studio: rehearse out loud

Answer in STAR form and get scored by Rose.

1. Open the Studio from Practice or the top button
2. Pick a question and press Record; aim for 2 to 4 minutes
3. Press Rose, score my answer, then add your self-score
4. Export a transcript to Word to review later

Done when: you've answered and scored at least 5 questions.

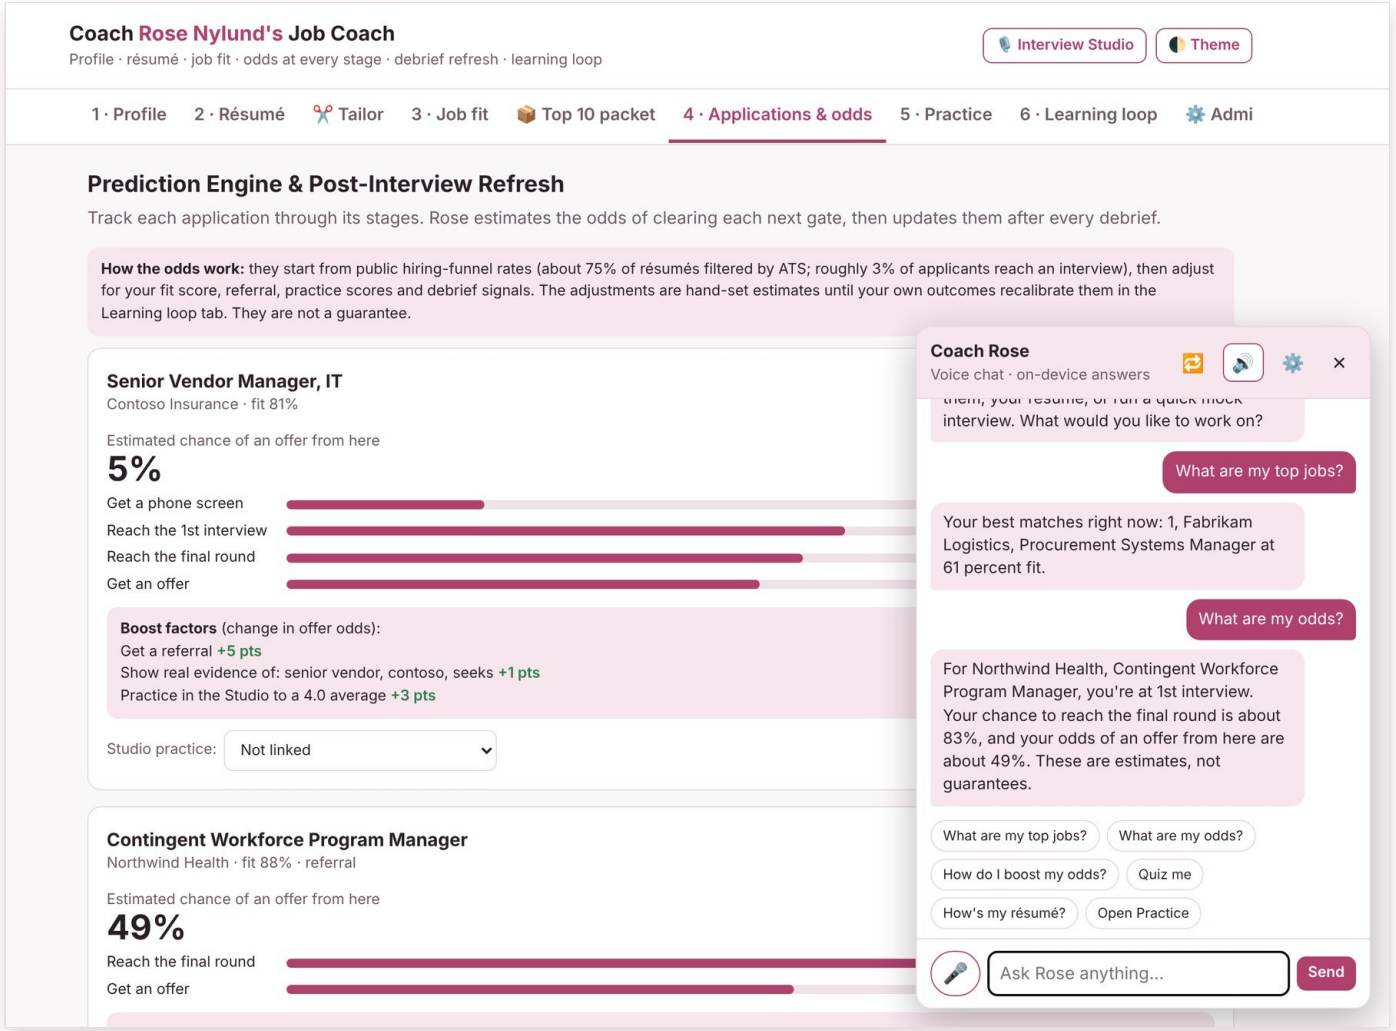

Talk to Rose: ask your coach out loud

A voice chat with Rose, answered from your own saved jobs and odds.

1. Press the 🎙️ Talk to Rose button in Job Coach
2. Tap the mic and talk, or type
3. Try a chip: top jobs, odds, boost, résumé
4. Say Quiz me for a spoken mock interview

Done when: you've asked Rose about your odds and tried one quiz question.

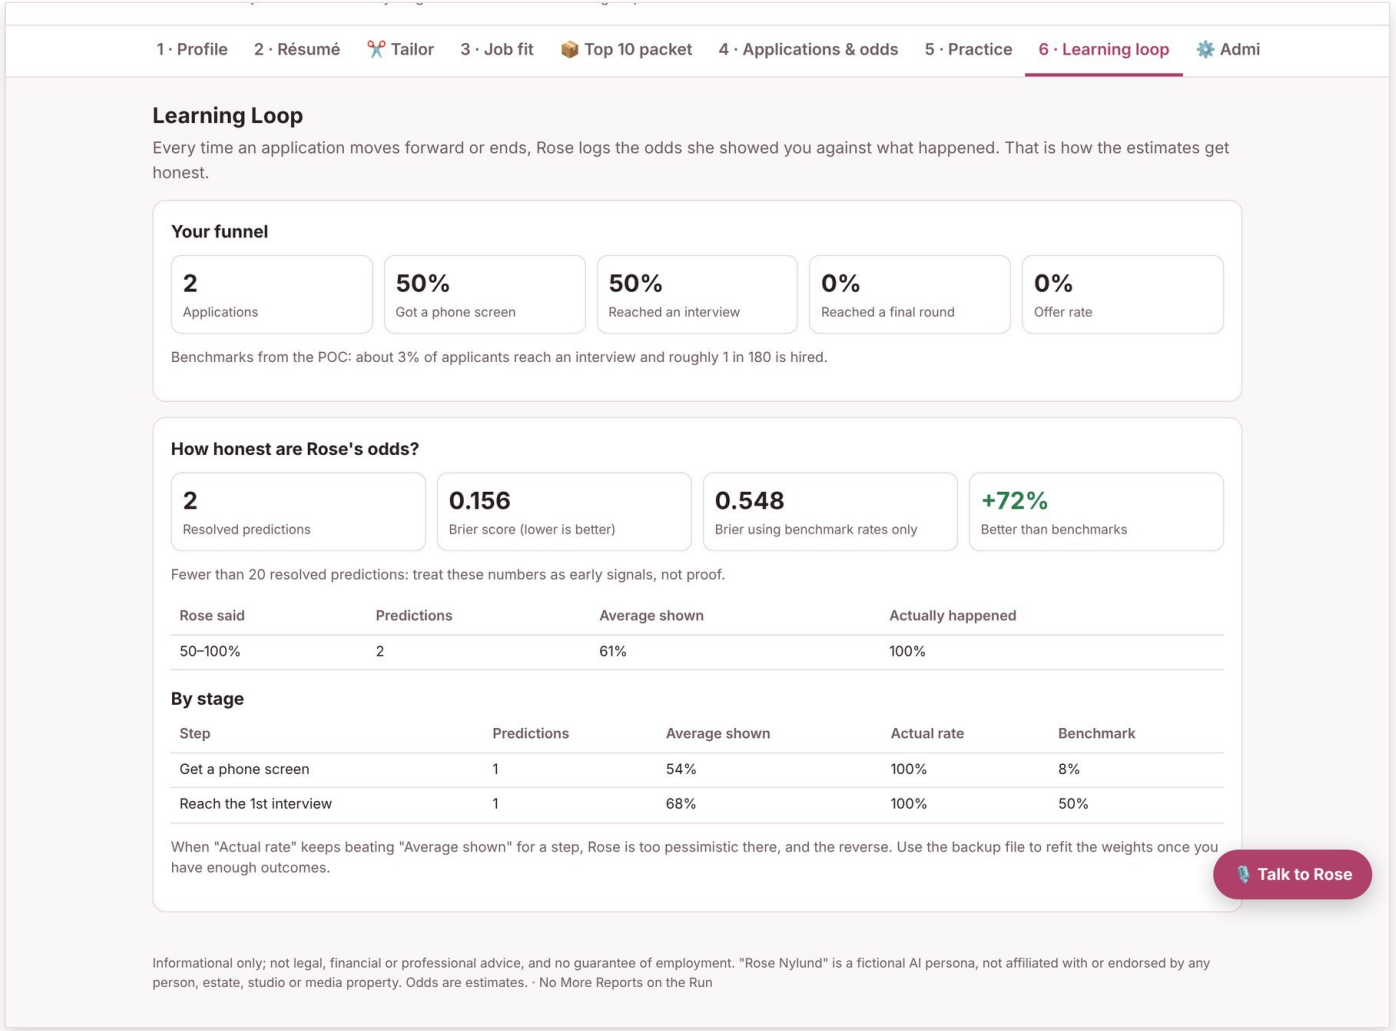

6 Learning loop: how honest are the odds?

Nothing to fill in. Rose logs each estimate against what happened.

1. Read your funnel: phone screens, interviews, finals, offers
2. Compare with the benchmark line
3. Check the Brier score: lower is better
4. Under 20 outcomes, treat it as an early signal

Done when: closed applications are marked, and you review this monthly.

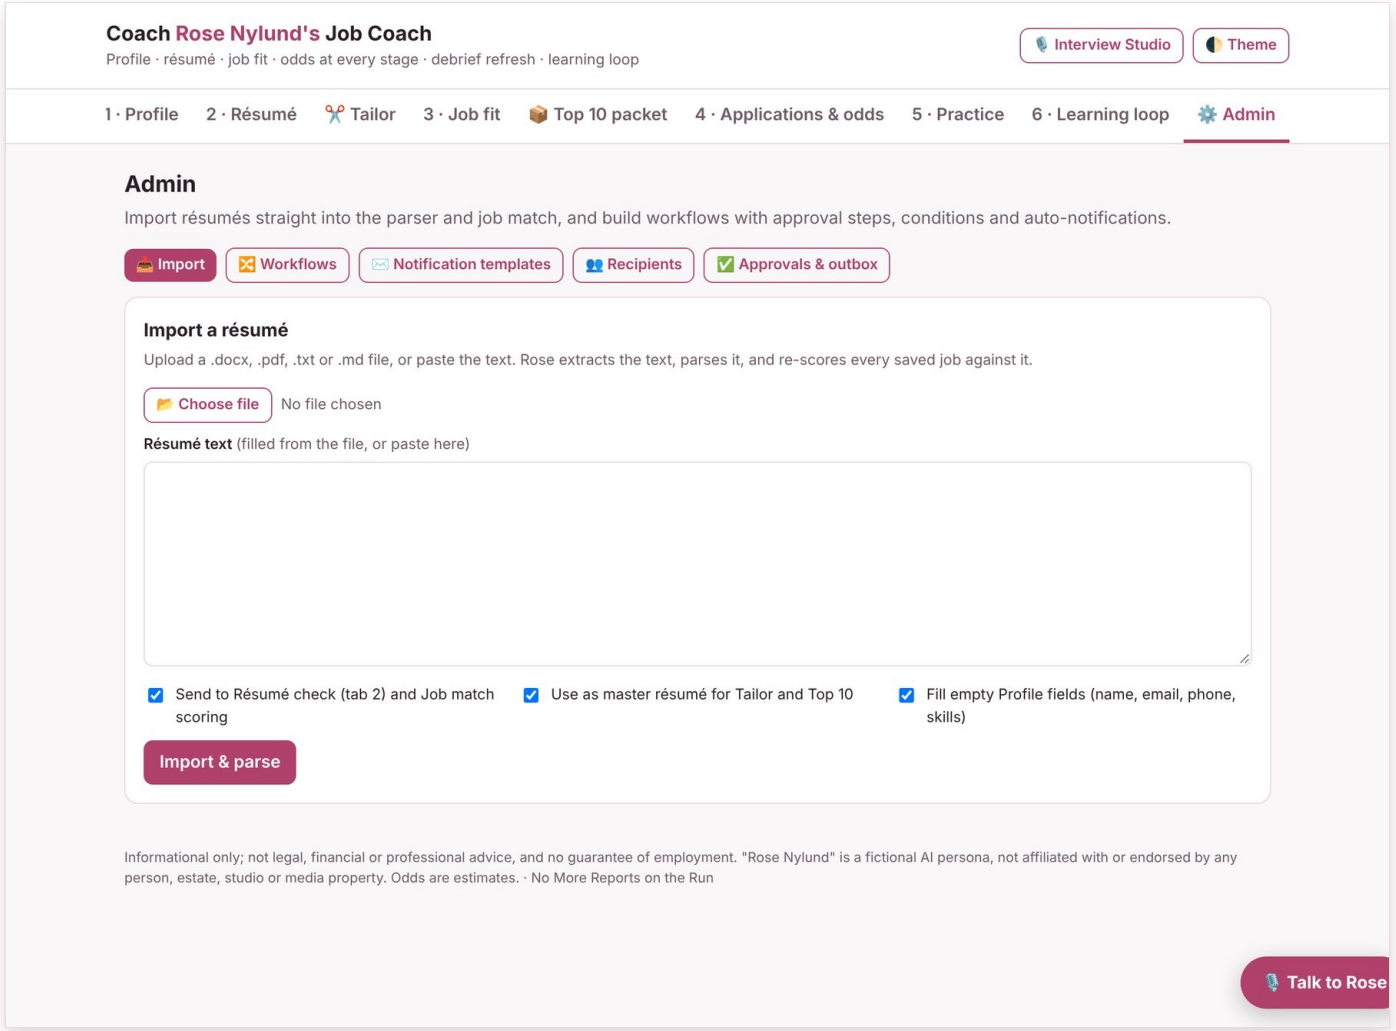

Admin: import your résumé in one go

Load a .docx, .pdf, .txt or .md file into every tab at once.

1. Open Admin; Import shows first
2. Choose your résumé file or paste the text
3. Keep all three boxes ticked
4. Press Import & parse; every job is re-scored

Done when: your résumé is imported and Profile fields are filled.

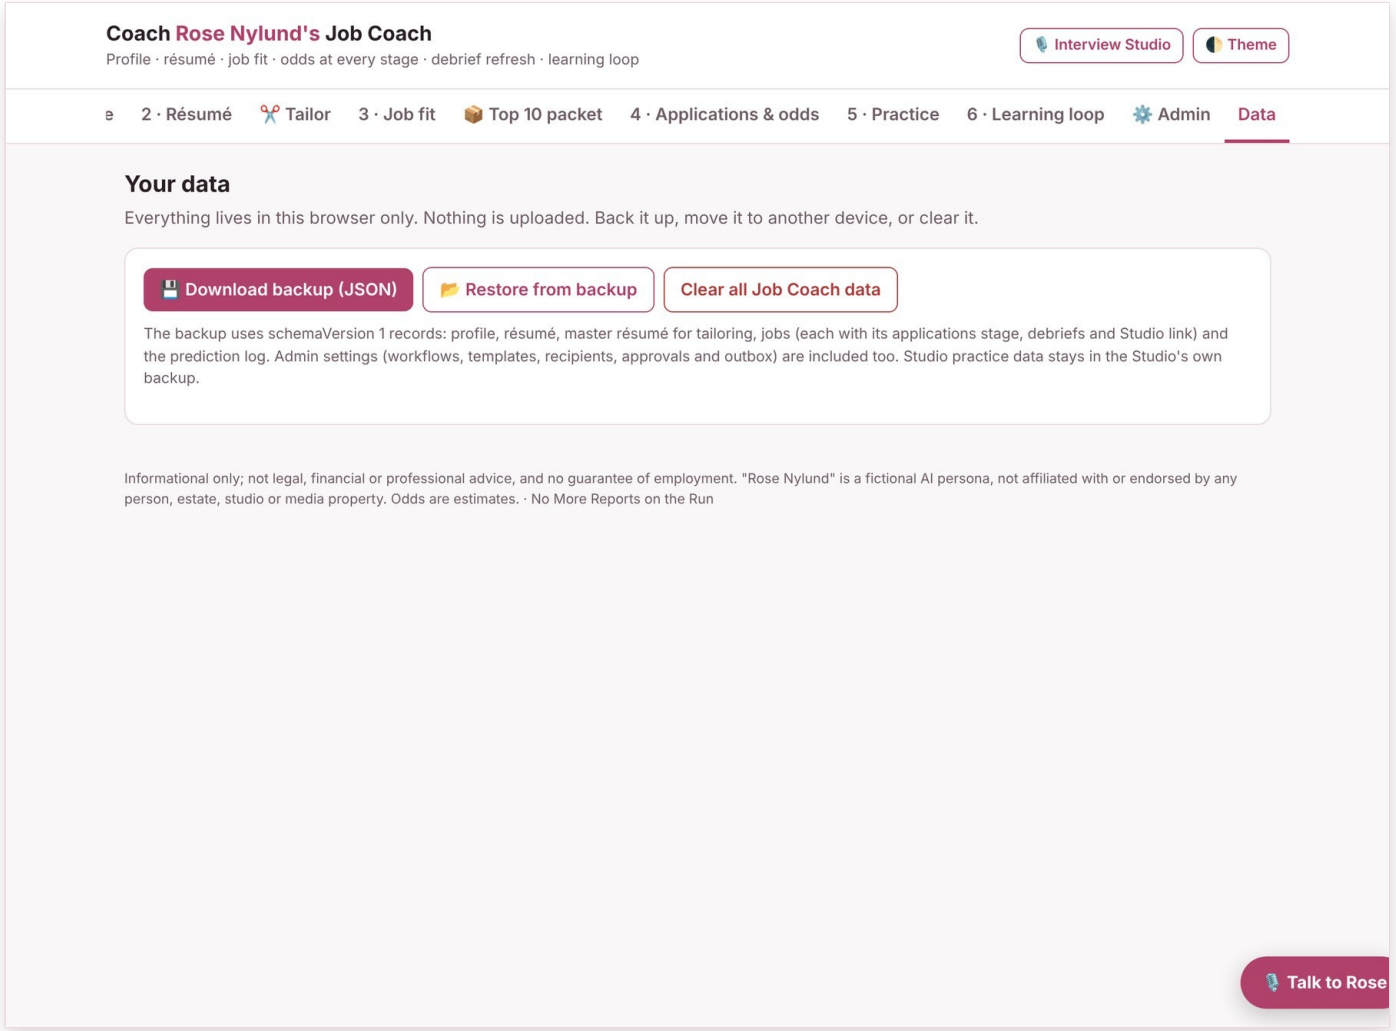

Your data: back up, restore, start over

Your data lives only in this browser, so a backup is your safety net.

1. Download backup (JSON) weekly
2. Restore from backup on a new computer
3. Clear all data only to start over; it can't be undone
4. Back up Studio practice from the Studio itself

Done when: a backup is saved somewhere safe, such as OneDrive.

Your weekly rhythm

When	Do this	Tab
A posting you like	Save it and read its Job Fit Card	Job fit
Before each application	Tailor your résumé and pass Check it	Tailor
After you apply	Press I applied	Job fit
Once a week	Refresh your top 10 and save the packet	Top 10 packet
Interview booked	Build the question bank and practice	Practice, Studio
Same day as the interview	Debrief and send the follow-up	Applications
When you hear back	Update the stage	Applications
Once a week	Download a backup	Data
Once a month	Review your funnel	Learning loop
Any time	Ask Rose about your jobs and odds	Talk to Rose

Start your camp today

Profile first, then your résumé, then your first job. Rose takes it from there.
